

We are delighted to announce that we will be commemorating the 33rd annual **Marine Money Week** event during our previously scheduled dates in June. Since we can't be together, this event promises to be a wonderful opportunity to share some experiences with **Marine Money Week** friends and get caught up on market conditions. Like Marine Money Week, this will be both informative and a lot of fun.

To avoid "Zoom-out", we will feature four 45-minute live sessions at 10:00 am ET and/or 2:00 pm ET respectively, on the previously scheduled **Marine Money Week** dates, June 15-17, plus some "bonus" features on Thursday and Friday.

Dry Cargo: The Classic Cyclical Shipping Opportunity

With rates and values depressed and Chinese demand growing, 2020 may mark one of the best entry points into Dry Bulk in recent memory, but not all ships are the same. In this session, CEOs of leading companies talk about their business, strategies and outlook for a cyclical up-turn in a supply constrained market.
